

*Touch. Experience. Connect.*

**Enable Discourse:** Allow Stakeholders to communicate with corporate office and even each other from *inside the app itself*.

**Promote and Market:** Integrate with your social media marketing campaign. Make Stakeholders your ambassadors.

**Analytics & Tracking**  
Behind the scenes analytics tell you *who, where, what* and *how often* stakeholders engage.

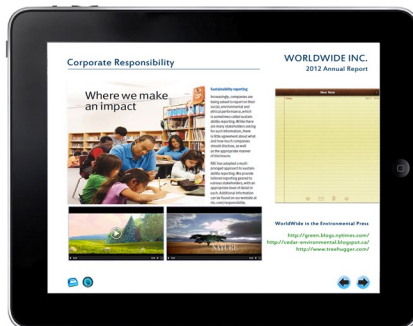

**Built-In Translations:** With one touch, Stakeholders in multiple jurisdictions can read in their native language.

**Customizable:** Provide Stakeholders with the controls you want: layout, notifications, geo-location on/off.

**Secure:** set levels of content based on login credentials and control and track your readership.

**Update Anytime:** ePublish once, then update anytime.

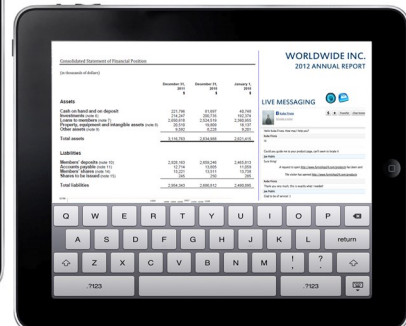

### Media Rich

- Live text allows for instant translations and instant updates.
- Retinal display graphics give your report the impact it needs.
- Embedded HD Video means your message will be seen, even with subtitles.
- External Links tells Stakeholders you are connected to the outside world.

### Interactive Graphics

- Uniquely interactive graphs, charts and menus present information in the way that will help your audience understand your message.
- Intuitive menus that give Stakeholders the power to quickly find the information they need.

### Communicate & Collaborate

- Optional, built-in messaging allows you to communicate directly with Stakeholders through our secure cloud-based collaboration features.
- Enable Stakeholders to connect with each other and build a community around your company or organization.
